The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The 112 rejections are withdrawn, in view of applicant's amendments and remarks of 11/03/03.

Claims 1-15, 19, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaguchi et al JP 10110194 and Kralovic et al 5350563.

The rejection of record is maintained. Yamaguchi & Kralovic utilize the base donor, Yamaguchi; showing > the instant carbon, Kralovic less. Any one of ordinary skill in the art would find these references provide obvious utilization of intermediate C carbon chain Lengths. Motivation to so alter is within the purview of the artisan, in order to optimize parameters such as storage time, fragrance, availability of and cost of donor compounds. Thus, although Yamaguchi provides the essence of the instant invention, but does not focus on desired instant application, nor specify PH changes. Kralovic does – see col. 1 bottom, and Col. 2 summary. Since Kralovic teaches the use of sodium perfluorooctanoate (col. 3, lines 35-45) powder, buffer anti corrosive and surfactants, one in the art of disinfecting/cleaning would find it obvious to incorporate these functionalities in the wider utilization of the Yamaguchi donor than the exemplified salicylic acid of Kralovic. Motivation to increase donor compounds range and thus form longer chain peroxy acids is shown by Yamaguchi, while the use of anti corrosive/sodium borate and buffer is shown by Kralovic, both references providing per acid cleaning/sterilizing.

Art Unit: 1616

Applicant's arguments filed on 11/03/03 have been fully considered but they are not persuasive. Applicant's arguments to the extent persuasive, have resulted in withdrawal of rejections, but not that of Yamaguchi – Kralvico here, we find one of ordinary skill in the art would find it obvious to vary carbon chain length of donor to optimize parameters such as fragrance, storage stability, cost minimization.

7.93 is wrong

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
